DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) filed on 4/11/2005 has been considered. See Attached PTO-1449 Form.

Claim Rejections - 35 USC § 102-Maintained

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 13 is rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No. 5,690,807 (Clark, Jr. et al).

Clark, Jr. et al disclose silicon nanoparticles of particles “size less than about 10 nanometers” (See claims 1, 18,19, 21-23). No difference is seen between the instantly claimed invention and the invention of Clark, Jr. et al. Clark, Jr. et al particles size range clearly embrace the instantly particles size of 1, 1.67, 2.15, 2.9 and 3.7 nanometers.

Response to Arguments

3. Applicant's arguments filed 4/11/2005 have been fully considered but they are not persuasive. Applicants argues, “Clark merely discloses distributions of particles including particles of larger sizes than those disclosed in the family.” This argument is not convincing, Clark does not describe his particles sizes in term of a distribution. Additionally, Clark et al disclose that silicon nano particles of a size less than 10 nm can be obtained (See col. 3, lines 42-48) and that smaller sizes can be obtained by further treatment (See col. 11, lines 33-42).

Art Unit: 1754

Therefore the small particles sizes obtained by Clark et al can be separated by conventional and known means in order to separate the particles by their sizes and thereby create the discrete family instantly claimed.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

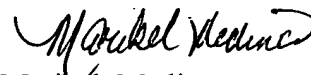

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
